

Dear Dr. Giller

As a current patient who has undergone extensive Periodontal treatment at your office. I am writing to let you know what a fine job. I feel that youve done.

When I first entered your office for treatment I was understandably, very frightened. However since I have been going for treatment my teeth feel worlds better and the treatments that I expected to be so uncomfortable, were not uncomfortable at all. There was really no reason to be scared. I would like to thank you for your help.

I recommend you to anyone who needs Periodontal work. I will also recommend to anyone I know who is considering not going for Periodontal work that they DO GO I was very worthwhile. Thank you again.

Sincerely,

Audrey Pruda
