Dr Giller is asking some of his special patients for their opinions about the treatment they have received in his office. Please take the time to answer the following questions and return it in the self addressed stamped envelope. We thank you in advance for taking the time to help us maximize our patient care.

How did the treatment you received enhance the quality of your life? In other words, what specific benefits did you derive from the treatment?

I've had pain on and off for years in one specific tooth/area. Dr. Giller sat down with me and discussed procedures & options. The procedure I chose was exactly the way he explained it. What advice would you give to others who are considering similar treatment? I would advise them to come in and discuss their options. Dr. Giller is very thorough and he will explain treatments in depth.

Please comment on your perceptions of the financial investment versus the benefits you received?

You can't put a price on professionalism. I've had insurance and Dr. Giller that accepted it however I was never satisfied. I continued to have problems over the years. Now, my insurance won't cover it. Was it worth the cost? In the long run, yes. Again, Dr. Giller explained the costs of implants vs. a bridge. An implant is expensive, but it will last hopefully for a very long time. A bridge will need to be replaced. Please comment on the quality of care you received, including follow up services.

Dr. Giller and his staff are very professional & courteous. Dr. Giller is a very compassionate and caring doctor.

If you have any additional comments, please feel free to express your thoughts.
