

Long-lasting results with BOTOX® Cosmetic (onabotulinumtoxinA)

“How long does BOTOX® Cosmetic last?
My doctor said that it varies from person to person.
But, in my experience, it's lasted about 4 months.”

Before (at day 0)

After (at day 7)

After (at 3 months)

After (at 4 months)

Photos of paid models taken at maximum frown before treatment with BOTOX® Cosmetic and taken at maximum frown after treatment with BOTOX® Cosmetic at day 7 and months 3 and 4.

Individual results may vary.

In clinical trials at day 7, 74% (299/403) of people demonstrated none or mild glabellar line severity at maximum frown as compared to 6% (8/132) in placebo; at day 30, 80% (325/403) of people demonstrated the same as compared to 3% (4/132) in placebo; at day 90, 48% (192/403)

Proven to last up to 4 months¹
Physician-reported response of 25% (102/403)
vs 2% (2/128) for placebo.¹

of people demonstrated the same as compared to 2% (3/128) in placebo; at day 120, 25% (102/403) of people demonstrated the same as compared to 2% (2/128) in placebo.¹

Side effects associated with the injection include localized pain, infection, inflammation, tenderness, swelling, redness, and/or bleeding/bruising.¹

Please see Important Safety Information on pages 2, 4, and 15.

What causes wrinkles?

Dynamic wrinkles are caused by contractions of delicate facial muscles when smiling, squinting, frowning and smoking. These lines can give a person an angry, tired or sad appearance, even when not expressing that emotion.

Today you can benefit from 2 of the most popular FDA approved wrinkle fighters, BOTOX® and Juvederm, to prevent and alleviate signs of aging.

Treatment for Black Triangles Between Teeth

Minimize the appearance of noticeable black triangles between your teeth with a minimally invasive dermal filler treatment. This simple treatment can take care of both esthetic and functional concerns.

What causes black triangles between teeth?

- As we age, we often get recession of our gums which can lead to loss of the tissue between our teeth
- Over flossing, loss resulting in damaged gums
- Post dental work such as veneers or implants

Who are good candidates for the black triangle dermal filler treatment?

Good candidates include people who like their teeth but are concerned with gaps between them. Dermal fillers can help fill in these gaps, leaving the shape of the tooth alone.

How long do treatments take and last?

Treatment takes approximately 5-10 minutes. Patients can expect the results to last 8 months or longer.
